RE: Bereza, Zuzanna

MRN: 5666393

Dear Bereza Family:

It is our pleasure to provide you with an opinion and treatment options for Zuzanna. Based on the medical records you provided, which have been reviewed by Dr. Chris Baird and Dr. Michael Farias, Zuzanna may be a surgical candidate as outlined in Dr. Chris Baird's September 8, 2023 letter.

The Cardiovascular Program is pleased to extend an inclusive global discounted rate. This rate is **USD \$300,858.24** and includes the following services at Boston Children's Hospital: cardiac evaluation prior to catheterization and cardiac surgery, lung scan, CT scan, 3D model, catheterization, cardiac surgery, hospital admission for catheterization and cardiac surgery, and related medical services while inpatient. This rate also includes 1 post-discharge cardiac visit and cardiac testing before your return home.

Upon discharge from the hospital, if Zuzanna were to need outpatient services such as medication, oxygen, physical therapy, etc., those costs would not be covered under this rate.

Please understand the above is a global discounted rate and we will cover all charges associated with care from the Cardiovascular Program. In the unlikely event that the diagnosis and/or procedure are different from originally planned, this discounted rate will no longer apply.

This rate does not include any treatment or care by other specialties (such as Ortho, Neurology, Dental, etc.). **Please note this rate is extended to self-pay international families and not to insurers, government agencies, or non-profit organizations. Statements required for insurance refunds will not be provided.**

We recommend staying in the Boston area for approximately 4-5 weeks for Zuzanna's recuperation and post-operative appointment.

As you are arriving to Boston Children's Hospital solely for clinical services, the clinical team expects your care to be repatriated to your home health care system/provider for post treatment care after your post-procedure appointment which will be noted in the medical record.

Important financial information below. Please read carefully.

A total deposit of **\$300,858.24** must be received in full 21 days prior to the first appointments and surgical date. Please take into account any additional processing fees that might be associated with a wire transfer (for example, via an intermediary bank). We ask that you coordinate with the financial institution to ensure **\$300,858.24** is fully received prior to the start of services.

We understand this is a stressful time for your family, especially given the great distance you will need to travel. We are available to make the process run as smooth as possible. If you have any questions on the above, please do not hesitate to contact us.

Sincerely,

Department of Cardiology & Department of Cardiac Surgery
